

# Welcome

Welcome to the latest version of the CDT door price list.

In this version we have listened to our customer base and tried to develop a price list that is both very competitive and comprehensive.

We now boast 33 stock vinyls with in excess of 70 additional vinyls from our suppliers (additional vinyls subject to a surcharge).

This price list has been developed over the past 6 months, and the features and benefits have been aimed at assisting your kitchen planning and ordering.

CDT have invested in the most up-to-date machinery, including our Bulleri FPF4222 CNC router and twin table 3 metre Simimpianti Membrane press giving us the capacity to press our cornice and pelmet in the same colour as the doors and drawers.

You will see from this price list that made to measure timber doors are available as well as MDF vinyl pressed doors.

## **General Specification**

Polyvinyl Chloride (PVC) Doors are manufactured from a Medium Density Fibreboard (MDF). The MDF is routed to give the shape and detail of the door then a water based heat activated (85 deg) adhesive is applied to the routed face and finally under heat and pressure the polyvinyl is applied.

Polyvinyl Chloride (PVC) - this is a widely used thermoplastic polymer.

Medium Density Fibreboard (MDF) - An engineered material. This material is formed by breaking softwood into wood fibres combining them with wax and resin and then applying high pressure and temperature to form panels.  
Adhesive - a water based heat activated adhesive is used at high temperature to bind the PVC to the MDF

## **Product Properties**

MDF - 18mm thick board. Prelaminated with a colour coded single sided balancer.

The main benefits of using MDF are:

- It is more cost effective than natural wood.
- There is no grain therefore there is no tendency to split
- Consistent in strength and size due to having been man made.

PVC - PVC foil is available in many different colours, wood grains and high gloss finishes.

The main features are:

- Foil thickness is 0.4mm on standard and wood grains compared to some who are using a 0.2 or 0.3mm foil.
- High gloss foil thickness is thicker typically 0.6mm

## **Delivery details**

Delivery is 7-10 working days from receipt of signed acknowledgement for vinyl pressed doors (please allow an additional 10 days for timber doors), free delivery service on orders over £500 (within 100 mile radius). Orders under £500 will incur a £50 delivery charge.

Please ensure all orders include the full delivery address, including the postcode.

If delivery is to site please ensure there is a physically able person available to assist in the offloading, as some of the product can be heavy.

All deliveries must be signed for by a representative of the customer as being complete, if absent product are not highlighted at that time then we reserve the right to charge for additional product.

## **Terms**

Deposit against order (usually for at least the first couple of orders)

Bankers Draft

Credit Card

Cheque

Cash

## **Specials and Non Standard**

Because we manufacture every door to your individual specifications, it allows you the option to have tailor made doors. Non-standard doors are priced on the next size up.

## **Returns and Replacement Policy**

As our doors are produced on a made to measure policy, we are unable to take correctly ordered or incorrectly ordered doors. However if doors supplied are not supplied as per order, then **CDT** will supply the correct item within 3 working days. Incorrectly ordered items will be ready within 4 working days where possible.

## **Complaints Procedure**

In the unlikely event that you are not satisfied with the product that we offer, CDT must be notified in writing within 7 days of delivery of the products. We cannot be held responsible for any consequential loss, third party claims or other claim which may arise due to circumstances beyond our control.

## **Retention of Title**

All goods remain the property of CDT until full and final payment has been made.

## **Guarantee**

CDT products are guaranteed against defects in materials and workmanship for a period of 12 months from the date of delivery. This guarantee does not extend to products which have been misused or installed incorrectly or in a hostile environment.
